

# ANNEX™

## REINKE PRECISION MANAGEMENT

### SIMPLE, YET SMART

The RPM Annex pivot controller utilizes the power and versatility of the RPM Preferred (AnnexPF™), Advanced Plus (AnnexAP™) or Connect (AnnexCT™) main control panel for a fraction of the cost of a complete panel. This option in the Reinke line of pivot controls “annexes” the existing panel, using its back-end components.

## Features and Benefits

### Innovative

Upgrade control panels to the latest and most powerful pivot control technology

### Economic Value

Eliminate additional costs associated with purchasing a whole new panel

### Versatility

Compatible with all center pivot brands

### 5 Year Warranty

Unmatched reliability and durability

## ReinCloud-Ready®

### Remote Access

Monitor and control pivot without being at the panel

### Increase Efficiencies

Manage multiple systems from one dashboard

### Ease of Mind

Receive notifications when there's a change in the systems status

S - Standard  
O - Optional

### AnnexPF

The AnnexPF (Preferred) uses touch screen technology and has the largest feature set of the RPM control panel line.

### AnnexAP

The AnnexAP (Advanced Plus) is cost friendly with an easy to use touch screen display.

### AnnexCT

The AnnexCT (Connect) is equipped with the remote control technology and is controlled directly from a smart device.
